

Breakout Session 2 Validation of Safety and Efficacy Biomarkers

**Federico Goodsaid, PhD
Gérard Maurer, PhD**

Bethesda, October 6th, 2005

Content

- **Scope**
- **Process map**
- **Profile of an ideal BM**
- **The path from exploratory to known valid BM**
- **Elements of BM validation**
- **Who should be involved**
- **Should we have different process maps for different types of BMs?**
- **Consensus**
- **Challenges when bridging into clinics**

Scope

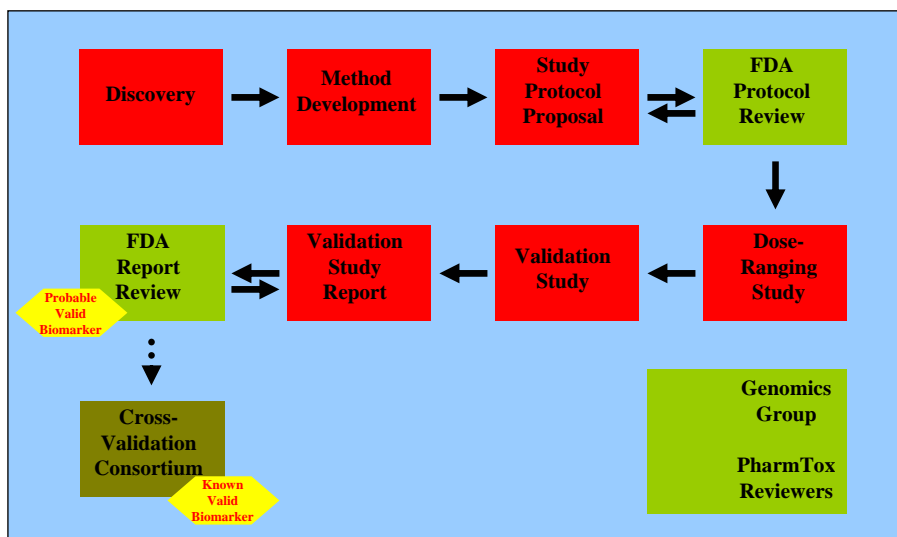

- Discuss process maps for the validation of genomics biomarkers of safety and efficacy
- Refer to specific examples for genomic biomarker validation
- Reach a consensus on a revised version of these process maps

... and efficacy? Is a clinical case study beeing added?

3 Breakout Session 2 Validation of Safety and Efficacy Biomarkers, F. Goodsaid, G. Maurer, 6th Oct 05

Baseline Process Map for Biomarkers of Preclinical Drug Safety Assessment

4 Breakout Session 2 Validation of Safety and Efficacy Biomarkers, F. Goodsaid, G. Maurer, 6th Oct 05

What is the profile of an ideal BM?

- Early
- Sensitive
- Specific
- Predictive
- Reproducible
- Robust
- Accurate/precise
- Accessible Sample
- Inexpensive
- Biologically/ mechanistically relevant
- Superior to existing markers
- Other?

5 Breakout Session 2 Validation of Safety and Efficacy Biomarkers, F. Goodsaid, G. Maurer, 6th Oct 05

The path from exploratory to known valid BM:

6 Breakout Session 2 Validation of Safety and Efficacy Biomarkers, F. Goodsaid, G. Maurer, 6th Oct 05

What are the elements of BM validation?

- **Technical/Assay**
 - Intra- and inter-sample
 - Intra-and inter-laboratory
 - Technical validation of assay
 - Statistical validation plan
 - Mapping to gold standard
 - Other?
- **Biological model**
 - Intra- and inter-species
 - Demonstration of desired profile
 - Biochemical, mechanistic relevance
 - Other?

7 Breakout Session 2 Validation of Safety and Efficacy Biomarkers, F. Goodsaid, G. Maurer, 6th Oct 05

Who should be involved in the validation and acceptance of BMs?

- **Exploratory BMs**
- **Probable valid BMs**
- **Known valid BMs**

8 Breakout Session 2 Validation of Safety and Efficacy Biomarkers, F. Goodsaid, G. Maurer, 6th Oct 05

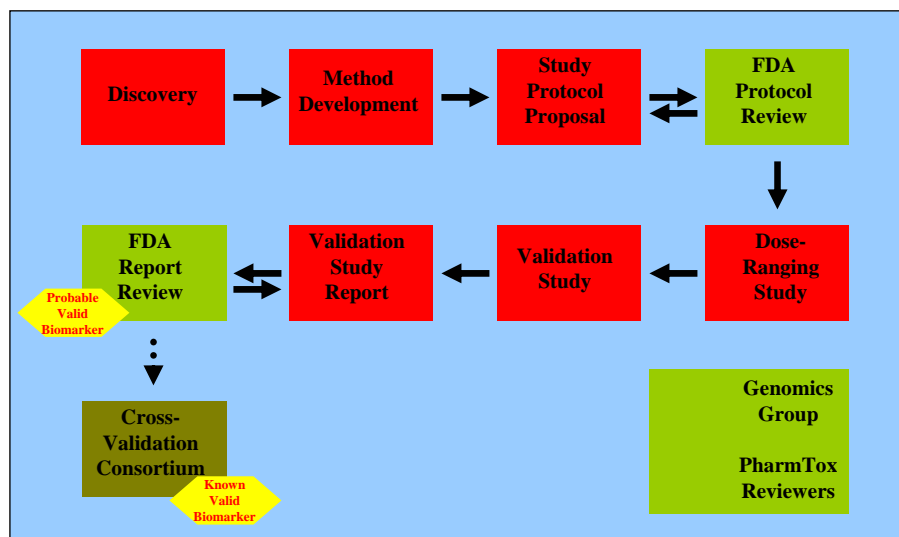

What is needed for regulatory acceptance of a BM?

9 Breakout Session 2 Validation of Safety and Efficacy Biomarkers, F. Goodsaid, G. Maurer, 6th Oct 05

Can we reach a consensus about the process map for biomarker validation?: *a figure ungrouped.*

10 Breakout Session 2 Validation of Safety and Efficacy Biomarkers, F. Goodsaid, G. Maurer, 6th Oct 05

What challenges do we face when bridging BMs derived from preclinical experiments are applied in the clinic?

Animals

- Healthy animals models
- Animal disease models
- Target organs easily accessible
- Limited predictivity for humans
 - Potentially different mechanisms
 - Difficulty in making quantitative predictions about toxic effects
 - Verbal feedback not possible
 - Other?

Human

- Variability in available population of healthy volunteers
 - Lifestyle
 - Co-medication
 - Predisposition for disease
- Variability in available patient population
 - Lifestyle
 - Co-medication
 - Predisposition for disease
 - State of disease
- Peripheral tissues accessible
- Diseases or disease subtypes may be poorly characterized
- Verbal feedback possible
- Patient privacy
- Other?
